Computation of ADM Task Force

CHARGE:

The OSAA Executive Board requests that the Computation of ADM Task Force review the following topics:

- Current computation formula used by the OSAA to classify schools as outlined in Article 6.3.
- Changes that were made during the previous iteration of this Task Force, including:
 - Using ADMr for grades 9-11 vs. 9-12
 - Three-year average vs. one-year snapshot
 - Counting 9-11 students residing in the school's attendance boundary but attending a separate non-full member school administered by that school's school district
 - SES Factor, including use of the Free and Reduced Price Eligibility of Oregon Public Schools report
 - Private School reporting process
- Additional criteria to potentially consider based on feedback during the Classification and Districting process:
 - Using school participation figures in the computation formula
 - Adjusting/eliminating the SES factor
 - Counting 9-12 students again
 - Factoring in the impact of transfers
 - Incorporating a success/lack of success factor
 - Adjusting how private schools are classified
 - Examining any disproportionate impact of current formula on smaller schools
- Review of other reports from the Oregon Department of Education that could provide a better view of school populations as it relates to interscholastic participation.
- Consideration of policies in effect in other states as it relates to computation of ADM
- Plus, any other topics deemed relevant by the Task Force

The Task Force may forward recommendations for modifications to the OSAA Executive Board.

MEETINGS:

Meeting schedule will be determined once Task Force is convened. Opportunities for public testimony to be determined by the Task Force. Updates will be issued to the membership after each meeting.
